Version 10.1.0.6

Release Date: September 3, 2014

New in this Release

Component Versions

1. **NetEPC : 10.1.0.6**
2. **NetEPC Management System (NMS) : 10.1.0.6**

Resolved Issues

Issue #	Summary
10123	NetEPC PGW does not enforce a policy of 0 kbps rate when installed by the PCRF.

Known Issues

Issue #	Summary
9741	NetConsole user occasionally receives a '404 bad request' error. **Workaround:** From your browser settings, remove all cookies and restart the browser.

Version 10.1.0.5 Beta

Release Date: July 23, 2014

New in this Release

Component Versions

1. **NetEPC : 10.1.0.5**
2. **NetEPC Management System (NMS) : 10.1.0.5**

Resolved Issues

Issue #	Summary
10188	Capex procedure is not successful with NetEPC PCRF when Auth-Application-Id is present at the command level of CER from AF.
10238	NetConsole does not allow to choose QCI for different Media Types (e.g., voice, video etc).
10277	Attach Request with "EPS Attach Type= 0" is rejected by NetEPC MME.

Known Issues

Issue #	Summary
9741	NetConsole user occasionally receives a '404 bad request' error. **Workaround:** From your browser settings, remove all cookies and restart the browser.
10123	NetEPC PGW does not enforce a policy of 0 kbps rate when installed by the PCRF.

Version 10.1.0.4 Beta

Release Date: June 17, 2014

New in this Release

1. Data Cap (volume bundle) in Subscription Profile.

Component Versions

1. **NetEPC : 10.1.0.4**
2. **NetEPC Management System (NMS) : 10.1.0.4**

Resolved Issues

Issue #	Summary
9516	NetEPC PGW does not send MS-ISDN as Subscription-Id in CCR message.
9835, 9818	NetConsole Element Management page loads very slowly and gives script execution error.
9866	Logging to NetConsole fails after loading a previously saved network configuration.

Known Issues

Issue #	Summary
9741	NetConsole user occasionally receives a '404 bad request' error. **Workaround:** From your browser settings, remove all cookies and restart the browser.
10123	NetEPC PGW does not enforce a policy of 0 kbps rate when installed by the PCRF.

Version 10.1.0.3 Beta

Release Date: April 30, 2014

New in this Release

Component Versions

1. **NetEPC : 10.1.0.3**
2. **NetEPC Management System (NMS) : 10.1.0.3**

Resolved Issues

Issue #	Summary
9863	User can not configure destination realm of diameter peer nodes of NetEPC PGW.

Known Issues

Issue #	Summary
9741	NetConsole user occasionally receives a '404 bad request' error. **Workaround:** From your browser settings, remove all cookies and restart the browser.
9516	NetEPC PGW does not send MS-ISDN as Subscription-Id in CCR message.

Version 10.1.0.2 Beta

Release Date: April 04, 2014

New in this Release

1. NetEPC HSS with S6a interface.

2. NetEPC PCRF with Gx and Rx interfaces.

3. NetEPC OFCS with Gz interface.

4. Usage monitoring in NetEPC PGW for enforcing fair data usage policy by PCRF.

5. Synchronization of primary and secondary SPR for 'Deployable' NetEPC.

6. Dedicated bearer procedures over PMIP-based S5.

7. Local breakout Roaming.

8. VoLTE using IMS infrastructure (without SRVCC).

9. Redirecting prepaid subscribers to a captive portal for recharging

Component Versions

1. **NetEPC : 10.1.0.2**
2. **NetEPC Management System (NMS) : 10.1.0.2**

Resolved Issues

Issue #	Summary
9294	When NetEPC PGW enforces traffic shaping, data rate displayed in subscriber monitoring page of NetConsole is incorrect.
9550	NetEPC MME fails to establish Diameter session with an external HSS if the HSS does not include the supported vendor-specific applications in Auth Application ID AVP inside CER/CEA message.
9601	When piggybacked dedicated bearer is created using NetEPC PCRF, DNS server is incorrectly configured in the UE.

Known Issues

Issue #	Summary
9741	NetConsole user occasionally receives a '404 bad request' error. **Workaround:** From your browser settings, remove all cookies and restart the browser.
9516	NetEPC PGW does not send MS-ISDN as Subscription-Id in CCR message.
