

Version 2.0.0.5 Beta

Release Date: June 15, 2010

Component Versions

1. **MME Functional Tester : 2.0.0.5**
2. **Test Executive : 2.0.0.11**
3. **MME Functional Tester Test Procedures : 2.0**

New in this release

1. The MME Functional Tester now includes a HSS Adapter so that tests can be run without the need for a third-party HSS in the test bed. The MME Under Test can be configured to use either a third-party HSS or the MME Functional Tester as the HSS over its S6a interface.
2. 28 additional test cases for the S1-MME interface.
3. 3 additional test cases for the S11 interface.
4. 41 test cases for the S3 interface.
5. 41 test cases for the S10 interface.
6. 15 test cases for the S6a interface.
7. 23 additional test cases in the Multi-interface test section.

Resolved Issues

Issue #	Summary
4246	MME FT should use separate SCTP streams for UE-associated and non-UE-associated signaling.
4260	License using a USB Security Key may not work properly on 32-bit Windows 7 Operating System.

Known Issues

Issue #	Summary
4248	MME Functional Tester sometimes crashes if user run tests in the user created nested test batch.
4601	Test Procedure can be improved to force the DUT for sending optional IEs for the following Test cases 2.2.5.3, 2.2.5.4 and 2.2.5.6.
4608	Secure transport of Diameter message is not supported.
4596	Incorrect QoS parameters are exchanged during Initial Attach or Create/Update Bearer procedure.
4535	UE Capability Information Indication S1AP message is not supported.
